

Concerning Recommendation letter from obtain laser

Date 20th of February 2019

Student Matisse Quanten

Dear,

This letter is intended as a recommendation letter to apply for a laser as mentioned in the newsletter.

Within the educational program of 'design and production engineering', we try to focus on different production techniques and build our own setups when possible. Lately, we had several projects concerning 3D-printing. In addition, we want to extend the possibilities of the printer-setup by mounting a laser on the carriage instead of a printing head to engrave products. We would also try to cut some thin sheets of plastic we can use to vacuum form products later on.

It would be greatly appreciated if we could have a laser from you to use in our different projects.

If you need further information, you can contact me at any time.

Sincerely,

Koen Geyskens

Educator & Researcher

Design and production Engineering, Campus de Nayer, Sint-Katelijne-Waver, Belgium
